

# IMEX Melt-blown Bag Filter

## IMEX IMB Series Melt-blown Bag Filter Element

IMEX Melt-blown Bag Filter Retrofits are designed for:

- high flow requirements,
- high efficiency,
- high dirt holding capacity,
- inside to outside flow.

By increasing the surface area in original baskets and incorporating melt-blow depth filter media our unique design provides far longer life and superior dirt holding capacity compared to a standard filter bag design.

### Material / FDA compliant:

The element is 100 % melt-blown polypropylene, made with FDA compliant material for food and beverage.

### Specification:

Standard Ratings:	1, 3, 5, 10, 20, 30, 40, 70, 90, 150 Micron
Outside Diameter:	6" (152 mm)
Length:	Size 1 / Size 2
Beta Rating:	1000
Typical change out DP:	2,4 bar
Max. Temperature:	80 °C

Model	Design	Filtration Rating	Size	Endcap	Gasket Material
IMB	Depth	1 Micron	1	A type	EPDM
		3 Micron	2	B type	NBR
		5 Micron		C type	Viton
		10 Micron			Santoprene
		20 Micron			
		30 Micron			
		40 Micron			
		70 Micron			
		90 Micron			
		150 Micron
