

TopSpin™ HD Heavy-Duty Pre-Cleaner

Extending the Life of Air Filters in the Most Demanding Environments

Making air filters work better and last longer. **Whatever you throw at them.**

If dust, grit and dirt are a part of your daily operation, don't make your air cleaners do the job alone. Pre-cleaning the air entering the intake port can dramatically improve the life of air cleaners, and help avoid costly engine failure.

TopSpin™ HD air pre-cleaners are a tough, durable solution for the punishing conditions that can damage exposed equipment.

Available in eight sizes for every engine and airflow level.

Donaldson.

Construction
Mining
Oil & Gas
Quarrying
Logging
Road and Rail
Maintenance
Agriculture

and anywhere
your equipment
encounters heavy
dust and flying debris.

TopSpin™ HD air pre-cleaners separate and eject up to 80%* of incoming contaminants before they can reach the engine's air filter, resulting in:

Longer filter life, less frequent replacement.

Lower operating cost.

Less maintenance time.

In punishing environments like mining, oil and gas, and construction, exposed accessories like pre-cleaners can really take a beating. That's why Donaldson's TopSpin HD may be the last pre-cleaner you'll need to buy. Its all-metal construction, high-efficiency design and low restriction will eject the heaviest dust particles and keep functioning smoothly for as long as you own your machinery.

Best of all there's no bowl to empty. The self-aspirating design means contaminants are continuously purged automatically. Just install a TopSpin HD pre-cleaner and forget about it.

Built as tough as your equipment

Rugged one-piece **aluminum hood** with recessed discharge louver sheds flying debris.

One-piece **stainless steel impeller** is the only moving part. Dual bearings ensure reliable performance.

All the interior components are solid stainless steel to resist dirt, water, heat and abuse.

Stainless steel clamp with locking nut makes installation quick and secure. Clamp is included with each TopSpin HD.

*ISO 5011 with coarse dust

TopSpin HD air pre-cleaners are available in eight sizes, so you can choose one that is appropriate for your airflow requirements.

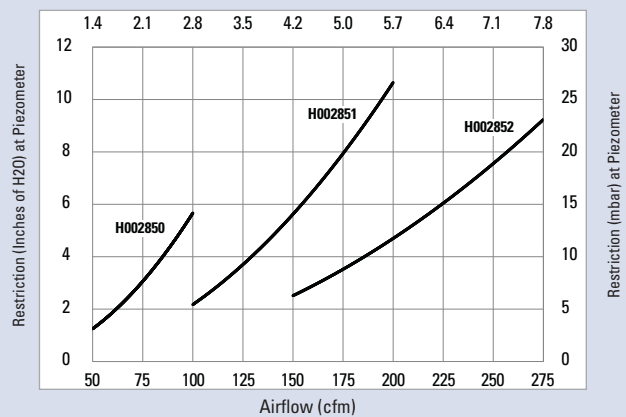

Your engines will breathe easier.

You'll use far fewer air filters.

You'll operate at lower cost, with less maintenance downtime.

Dimensional Specifications & Order Information

Donaldson TopSpin™ HD pre-cleaners can be mounted in an upright position or horizontally with louver opening at the bottom. Installation instructions and stainless steel locking clamp are included. Limited Lifetime Warranty.

Operating temperature range: -40°F to 180°F (-40°C - 82°C)

IMPORTANT

Mount on metal inlet tube only. Do not mount on plastic inlet tube.

*SCFM = Standard Cubic Feet per Minute. The ISO 5011/SAEJ726 test procedure was used to extract the results in the charts above. The ISO 5011/SAEJ726 is a widely accepted industry test used by OEMs to evaluate the efficiency of the intake system components. Test results are an average from testing several units.

If you currently use Donaldson Full-View or TopSpin™ pre-cleaners, find a compatible TopSpin HD heavy-duty pre-cleaner from the chart below.
